## TELECOMMUNICATIONS

Reliable and fast business connection

### National coverage, strong infrastructure

Our optical network with national coverage and strong infrastructural background guarantee the stable business operations of our partners, no matter where their premises are located, and what type of voice and data connection they need. We offer flexible and fast, tailored solutions to medium-sized and large enterprises.

The mission of Invitech is to **provide complex infocommunications services to medium-sized and large enterprises as well as institutions**. Invitech as a partner provides professional solution not only to specific tasks, but offers a **versatile response to complex business challenges**, ensuring maximum satisfaction of IT and telecommunication needs of its clients. The client portfolio of Invitech includes companies involved in the energy and public utilities sector, manufacturing, trading, logistics and financial sector as well as public institutions and municipalities.

11 000 kms

workers

### THEY CHOSE US:

**Choose our modern and reliable voice, data and Internet services, and communicate with your business partners in a cost-effective way.**

## DATA CENTER

Modern IT infrastructure for continuous business operations

### DC10-III: Hungary's most advanced data center

The data centres of Invitech have been implemented in accordance with the international recommendations specified by Uptime Institute. These recommendations cover the specific technological details, and are to serve the effective assessment and comparison of infrastructure. Tier III means an infrastructure that can be managed without affecting the continuity of ICT service (availability: 99.98%).
